Mailing size, \$12.00 per dozen

Half dozen at dozen rates.

Kernels of Facts about the English Walnut

THE United States consumes more than 50,000,000 pounds a year.

The United States imports about 27,000,000 pound a year.

The price is advancing steadily with the demand.

Besides being profitable, the English Walnut is a clean, highly ornamental shade tree.

The leaves remain on the trees until late in the Fall, not littering up the ground during the Summer.

English Walnuts are not only a rare table delicacy, but may be utilized for catsup, pickles and oil.

One pound of walnut meat equals eight pounds of steak in nutriment—and is a far more healthful food.

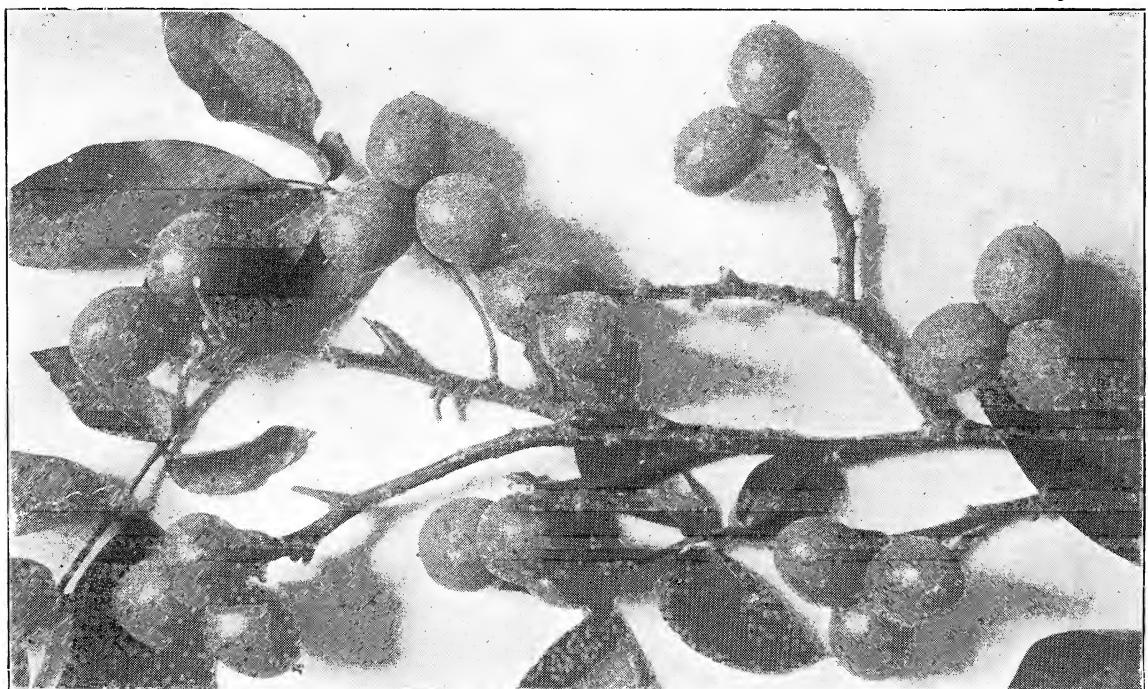

Nuts fall clean and free from outside shuck.

Frosts harvest the nuts—in October.

The total cost of producing and harvesting an English Walnut crop is about one and one-half cents a pound.
